#### MEMORANDA.

The schr Molokai, on her way to Molokai, met with a strong gale and heavy sea in the channel Had most of her sails split or blown away and had to put back. Anchored near Waialae during the night of the 29th, (having left here on the 28th,) made this port again on the night of the 30th, and came in the following morning in a very crippled condition.

The bk Comet, Capt Smith, left San Francisco Dec 17 and arrived at Hilo on Monday evening the 2d of Jan. Had light winds and calms during the first part of the passage; afterwards good

The following "Notice to Mariners," enclosed officially to the Minister of Foreign Affairs, by Henry Rhodes, Esquire, the King's Consul for Vancouver's Island, may interest those who are engaged in commerce with that island and its adjacencies : Notice to Mariners.-The entrance to the Fraser River has sheen re-buoyed. All the buoys are placed on the North or Port side of the Channel in entering, with the exception of one on the South Sand Head. The following table points out the position, and gives the des

cription of each buoy:
1. On South Sind Head - A spar buoy moored in 11 feet at low water. The spar painted white and black in horizontal bands, surmounted by a ball of the same colors also, in horizon-2. On North Sand Head .- A spar buoy moored in 11 feet. Spar black and white, in vertical lines, surmounted by a ball

nainted in the same manner S. On North side of the Channel .- A spar buoy moored in 9 feet. Spar black and white horizontally. Ball red.
4. A spar buoy moored in 12 feet. Spar, white and black hands horizontally, surmounted by a white diamond, and mark-

5. A spar buoy moored in 12 feet. Spar, white surmounted by a black diamond, marked 2.

6. A spar buoy moored in 11 feet. Spar, white surmounted LICENSES EXPIRING IN JANUARY, 1860 by a red diamond, marked 3

7. A spar buoy moored in 11 feet. Spar, white surmounted by a crescent red and black, marked 4. 8. A spar buoy moored in 12 feet. Spar, white and black vertically, crescent red, marked 5.

Or entering the River, the Sand Head buoys should not be approached within half a mile, until the passage between them is brought to bear N % E, when a vessel may steer in, mid-chan-

nel, or pass the North Sand Head buoy and the first one inside it, from a cable to a cable and a half's length. The remaining five buoys on the north side of the channel may be passed from half a cable to a cable's length, keeping them on the port hand in entering. After passing the inner buoy, a straight course may be steered for Garry Point. It must be remembered that the ebb tide sets to the southward, over the Roberts bank, and the flood to the northward, over the

Sturgeon bank. attention to these directions, a vessel drawing from 15 to If feet water, may enter the Fraser with safety at half tide.

The buoys assume a leaning position, varying from an angle of 35° to 80°, according to the state of the tide and wind, and can be plainly seen from a vessel's deck at a distance of three

iles in clear weather. Vessels bound for the River and coming through the 'Plumper's Pass, should steer N N W as soon as they enter the strait This course leads direct for the Sand Heads eleven

miles distant, some slight allowance being of course made for the tide, which runs from I to 2 knots in the strait, and more as the entrance of the River is approachd.

Vessels from the Southward, passing Robert's Point, must avoid the Robert's bank, which is very steep to; by not bringing the low part of this point to the Southward of East, the bank will be cleared.
